Pesticide residue remobilization over successive events
(K_{oc} = 1000 L/kg · OC% = 1% · IMOB1 · 3 events · dgPin = 0.1 mg/m²)
Linear isotherm — all events
$K_d = K_{oc} \times$ OC% · dgPin = 0.1 mg/m² each event
Freundlich isotherm — all events
$K_f = K_d$, N=0.85 · dgPin = 0.1 mg/m² each event
Linear isotherm — single application
$K_d = K_{oc} \times$ OC% · dgPin = 0.1 mg/m² event 1 only
Freundlich isotherm — single application
$K_f = K_d$, N=0.85 · dgPin = 0.1 mg/m² event 1 only
